***Reason for allowance***

The following is an examiner's statement of reasons for allowance: in view of the amendment filed on 08-24-06, the prior art reference of records (US Pat. 6,456,510) fails to a hot swappable pulse width modulation switching regulator controller comprising:

a pulse width modulation circuit coupled in series with a hot swap transistor, the pulse width modulation circuit including a pulse width modulation control circuit coupled to at least one switching transistor for switching the switching transistor on and off at a frequency determined by the pulse width modulation control circuit; a hot swap circuit turning on the hot swap transistor at a controlled rate in spite of the sudden application of power to the hot swappable pulse width modulation switching regulator controller and maintaining the hot swap transistor on until the hot swappable pulse width modulation switching regulator controller is no longer coupled to a source of power having the power source voltage as called for in claims 1 and 15. Therefore, claims 1-12 and 15-16 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
